InDorse Technologies Recognized By Computerworld as a 2011 Honors Laureate

New York, New York – July 19, 2011 – [InDorse Technologies](#), the leading provider of file protection software, today announced it has been named a 2011 Honors Laureate in innovation by IDG's [Computerworld Honors Program](#). The annual award program honors visionary applications of information technology promoting positive social, economic and educational change. InDorse joined a 2011 Laureates class that included companies like Cisco, IBM, Bank of America and Microsoft.

Founded in 1988, the Computerworld Honors Program is governed by the not-for-profit Computerworld Information Technology Awards Foundation. Computerworld Honors is the longest running global program to honor individuals and organizations that use information technology to promote and advance public welfare, contribute to the greater good of society and change the world for the better.

InDorse was recognized for their Call-Home and InDIA solutions. InDIA offers comprehensive file protection features including digital watermarks and automatic conversion to non-editable formats, ensuring confidentiality and accountability for sensitive files and images in the event the files are shared beyond the intended recipient(s). Call-Home provides innovative, Web-based file tracking and control that tracks location and detailed file usage activities across any IP network in real time, enabling end users to know immediately when and where a document, spreadsheet, presentation, or PDF file is opened.

“The number and quality of nominations this year were very inspiring and demonstrate how valuable IT is to community change,” said John Amato, Publisher, Computerworld. “Computerworld is very proud to name the 2011 class of Laureates and showcase their initiatives benefiting society through innovative uses of IT.”

The 2011 Laureates nominations were evaluated by Chairmen's Committee Advisors and Computerworld editorial leaders.

“InDorse strives to innovate and create an environment where people can freely share information without worrying about outside threats. This award showcases our work here and motivates us to continue to develop solutions that address key security needs,” said Rob Marano, President & CEO, InDorse. “We are humbled to be recognized as a member of the 2011 class of Computerworld Honors Laureates.”

About InDorse Technologies

Located in New York, NY, InDorse Technologies provides award-winning file protection software.

InDorse delivers a new level of file intelligence and assurance that supports risk management, audit, and security objectives. Leveraging the native security elements contained in files, InDorse discovers, organizes, classifies, watermarks, enforces, and tracks all files that contain sensitive information, inside or outside the corporate network. InDorse provides this protection without impact to end users, or any additional desktop software or agents, enabling business and collaboration, while transparently adding additional layers of monitoring and protection.
